DD01

DD01 is molded black friction material. The basic materials which are used are: phenolic resins and NBR as the bonding system. Reinforced with a high volume of short cut fibres which help to reach a very good mechanical and frictional performance. It is fully cured material and is suitable for bonding and riveting.

Material data

Recommended Working Values T° Max. Continuous Operation:

T° Max. Intermittent Operation:

| Friction Properties (according graphics) | | |
|------------------------------------------------|------------|-------------------|
| Static Friction Coefficient (15bar, from box): | 0.35±0.05 | μ |
| Static Friction Coefficient (15bar, 100ºC): | 0.50±0.05 | μ |
| Dynamic Friction Coefficient: | see charts | |
| Wear Rate: | see charts | |
| Tº Fading: | >350 | °C |
| Physical properties | | |
| Hardness (DIN53505): | 80±5 | Shore-D |
| Specific Gravity (ASTM D792): | 2.05±0.05 | gr/cm3 |
| Ignition Loss (ASTM D7348): | 35±2 | % |
| Acetone Extraction (ASTM D494): | 2±0.2 | % |
| Mechanical properties | | |
| Tensile Strength (ASTM D638): | 19±5 | N/mm ² |
| Compressive Strength (ISO 844:2014): | 110±5 | N/mm ² |

Appearance / Formats

Material type : Rigid material

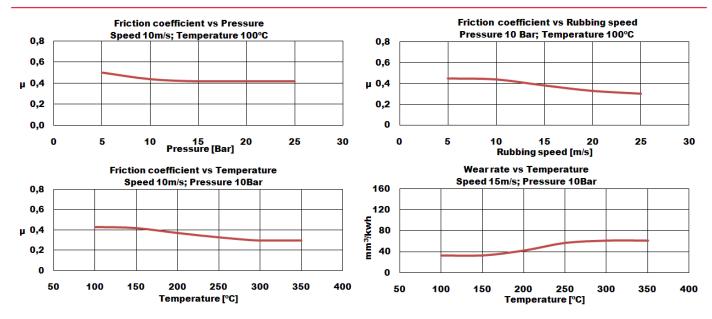

Applications

Brake pads - Friction washers - Gear discs for industrial devices - Rings segments for machinery

Price Level : $\mathbf{\in \in \in }$

Reach (EC)1907/2023 - RoHS 2015/863/EU : Compliance

| Others | | |
|-----------------------------|-------------------------------------------|--|
| Recommended Mating Surface: | Perlitic cast iron, hardness HB150-200 | |
| Recommended Adhesives: | Thermosetting adhesive | |
| Oil Resistant: | Yes | |

Rubbing speed, temperature and pressure are related. Changing any values will change other. The values shown represent typical conditions, but are not ultimate limits of the material.
